Zig Zag Word Search

Word searches may seem remedial next to other puzzles, but they provide several benefits: 1) develop word recognition, 2) assist in learning context clues, and 3) introduce/review vocabulary.

Super Mazes

Super Mazes are a perfect way to learn motor skills while also improving handwriting without having to write letters or sentences. Scanning is a valuable skill for reading and writing since it is critical to scan books from the left to the right side of the page.

Sum Searches

Sum searches are like word searches, but with numbers instead. What's cool about them is that they provide the same benefits as word searches, and allow you to practice addition skills.

Magic Squares

Mental math skills are strengthened by working on magic square puzzles. Each row and column of numbers must add up to the total at the end of their respective row or column.

Crossword Puzzle

Crossword puzzles are ideal for people who love words, general knowledge, and testing their problem-solving skills.

MEET THE FOUNDER

Cordell Jeter

In 1988, during my sophomore year of college on a football scholarship, I was a passenger in the backseat of a car that rolled down the side of a mountain. I found myself under the car with a shattered spine, leaving me paralyzed from the waist down. Creating my new life as a T-12 Paraplegic.

Always being the optimist, even through hospitalization and rehabilitation, I continued to work, look forward and setting new goals. Within a year of my accident, I competed in the Marine Corp Marathon and placed 4th in the Wheelchair Division. Next, I started Fairfax County's Kids Wheelchair Sports Program, which has now blossomed into a nationally recognized force, called "Fairfax Falcons". Now being coached, 25 years later, by three of my first kids in the program. Surreal feeling seeing them on Facebook...

In 1992, I competed in the Paralympics located in Barcelona Spain. Winning bronze and gold medals while setting a new world record in wheelchair racing. After competition, I started and successfully managed a durable medical equipment (DME) company for over 12 years acquiring a VISN-5 government contract servicing Walter Reed Hospital and the Washington D.C. Veterans Administration.

While working, friends and family gifted me an all-terrain tracked wheelchair through Go-Fund-Me efforts. I was amazed at my new ability to cruise over my backyard and right into the woods! Then realizing the freedom it meant to me was unexpected and overwhelming! Sitting in the woods, started memories of my childhood, dragging wooden pallets into the woods with hammer and 5 inch penny nails to hand build tree forts. At the same time, I had equal yet painful epiphanies of how kids with disabilities never had an opportunity to experience what I had forgotten. While sitting there I thought of the men and women I met coming back from war, blown-up, shot-up, burnt-up, missing limbs at Walter Reed Hospital. I thought about my Uncle who sat in hospice, wanting to go to the beach one more time. I thought of all my Paralympic team mates. This all-terrain chair should be available to everyone who needs it! It was an overwhelming feeling that people need to know about and have access to this technology.

It is now my focus to make this technology readily accessible. I am creating the next level of freedom for people with disabilities. I have designed and created an All-Terrain Battery Powered Chair, "EcoRover", with a unique design, using novel manufacturing techniques and assembly processes. EcoRover is intuitive, safe and allows outdoor independent mobility for people with mobility limitations. What was once thought impossible to independently traverse, sand, snow, grass, gravel, rocks, creeks is now possible! EcoRover is designed to increase access through lower cost direct sales to the consumer and rental services.

EcoRover is an All-Terrain Tracked Battery-Powered Chair designed for independent mobility over rough or uneven terrain. Easily traverse sand, gravel, dirt, mud, snow, grass, hills, tree roots, mulch and more.

Written Matters, are collections of my writings, from down through the years.

Very interesting situations and all of them are Factual. Even some of my poems of imaginations are written with thoughts, cares and situations in our everyday lives that are based on reality. While other poems are ALL SO TRUE!

Remembering far back in the 50's, my eyes have seen and heard some things some of the Younger generation wouldn't believe, or couldn't imagine existing in our present world of today. I would love to share with you some of these times of my life, and many things that relates to even YOUR LIFE!
